

DAMON-SEKO

PROSPRAY CHEMICAL SPRAY SYSTEM

Description:

The Damon-SEKO ProSpray cleaning and sanitation system automatically dilutes and dispenses concentrated cleaning products as a spray or foam; (foam wand required). Chemical feed rate is set by metering tips pressed into the barb on the side of the ProSpray. The ProSpray features brass fittings for hot water resistance, polypropylene injectors for chemical resistance, and a rugged stainless-steel casing for secure mounting and durability. ProSpray can be wall mounted or fitted to a cart for a mobile solution.

Key Features:

- Strong, long lasting and easy to clean rugged stainless-steel enclosure
- Flow rate: 13 gallons per minute
- Integrated hose rack saves space
- System may also be fitted to a cart for a mobile solution
- Can be used for spray or foam with available foam wand attachment
- Non return valve and metering tips easily accessible
- 15 different mixing ratios can be easily chosen, making the dosing accurate and effective
- The system attaches direct to a water source, with no electrical or compressed air connections required
- Damon-SEKO's "quick connect" manifold makes maintenance fast and simple

Part Number- 28400100

Includes:

- ProSpray system
- 15 metering tips
- 6' suction hose
- Wand with rise and foaming settings
- Complete installation kit
