

# MAC Trailer Wash & Brightener

**A strong acid cleaner for aluminum & stainless steel**

**Fast acting - Reduces labor cost**

**Safe to use on polished aluminum**

**Non-Flammable - Safer, may be used where flammables cannot**

### Description:

MAC Trailer Wash & Brightener will not bleach polished aluminum. It is a blend of phosphoric and sulfuric acid that will clean and brighten aluminum & stainless steel.

### Application:

MAC Trailer Wash & Brightener is a specifically blended formulation to remove oil, grease, road film and moderate oxidation from aluminum trailers.

### Dilution:

MAC Trailer Wash & Brightener is diluted at 20 ounces per gallon water (1:6) for typical applications.

### Directions:

Use personal protective equipment appropriate for the job. MAC Trailer Wash & Brightener is a concentrated cleaner that should be applied using the Damon-SEKO Chemical Spray System or with an acid resistant pump sprayer. Always start at the bottom of the equipment to be washed and work to the top to avoid streaks in the surface, as you uniformly cover the surface. Rinse well starting at the top and work down to prevent streaking.

### Chemical Spray System:

Damon-SEKO 28400100

### Packaging:

1 Gallon Jug-	28400301
5 Gallon Pail-	28400305
55 Gallon Drum-	28400355
250 Gallon Tote-	28400325
